Good Afternoon DK,

Context:
Park East Square neighborhood is used regularly as parking for CU Boulder students. Since the addition of shared dockless micromobility in Boulder the neighborhood has had some scooter parking issues during busy times of the school year (not so much during summer semester). Lime did a comprehensive walkthrough of the neighborhood and the area along Colorado Avenue with Park East Square HOA to identify potential geofencing and parking solutions. We came up with 5 total parking station locations that we could apply for with the City of Boulder. We believe all 5 locations are located on City public right of way within or near the neighborhood. That being said, if we are approved for these parking stations Park East Square is going to want Lime to implement a Mandatory Parking Zone on their property. If these parking stations are not built out to some level (i.e. how parking stations must be currently built out on CU Boulder campus property) the Mandatory Parking Zone will not operate efficiently. If you would like further details on that subject it would be our pleasure to provide them.

Request:
As contractually obligated and promised on our recent call, Lime has developed site plans to apply for these 5 parking stations. The folder link below includes street view photos, overhead satellite images and detailed site plans showing the location of the proposed parking stations. We are hopeful this ground work and proposal can be used to help create and implement an effective strategy to reduce potential micromobility parking issues in and around Park East Square. Thank you for your time!
